There was much surprise among some of nonneed the president's resignation, for apparently it was known to only a faw that ly. Hunter proposed getting out despite the opposition against his administration. Mr. Wilmer read a letter from the president the college, which said

Having resched my seventy-fifth year of age and fifty-sixth year of my service in the public educational avatem of this city I respectfully request my retirement from the presidency of the Normal College, a position which I have held for nearly thirty-seven years, the retirement to take effect September 1. With gratitude I can say that every board of trustees of the college has treated me with courtesy and

Mr. Wilmer said that Dr. Hunter would leave the college in a high degree of prosperity and had made it one of the most successful institutions of the kind in the country. He proposed that the retiring head of the college be made president emeritus.

Trustee Man, who in the past has fought opposition to Dr. Hunter's administration, made some remarks about the retiring president, saying that he was taken so much by surprise that he had to express his feelings without preparing a speech.

"This resignation comes to us so suddenly that I regret that I cannot speak with preparation and tell what is in my heart for President Hunter," he said. "When I was a schoolboy Tom Hunter—for so we used to call him-Tom Hurster's name was the most prominent in educational matters in this city. He has been at the head of the largest and most influential school in this country. He himself has been a most extraordinary influence upon teachers and pupils. His heart was full of love, simplicity and noble-

ness."

The resolution to accept the resignation was adopted, and it was decided to appoint a committee to prepare a memorial, which will be presented at the September meeting

During the past three or four years there have been warm debates in the meetings of the Board of Education over the administration of the Normal College. City Superintendent Maxwell was opposed to the way in which the college was conducted, and on several occasions his influence prevented some of the young women graduates from obtaining teachers' licenses. This gave rise to lawsuits in the Supreme Court, in all of

to lawsuits in the Supreme Court, in all of which the young women won.

It was said yesterday that Dr. Hunter had decided that he would not submit to any more nagging on the part of Dr. Maxwell, and so made up his mind to get out. Besides, it was asserted, President Hunter was proud of the girls that went to his college, and it pained him very much to see them injured because of Dr. Maxwell's disapproval of his administration. He thought that by resigning the City Superintendent might take a more tolerant view of his successor and not make it so hard for the pupils to get their licenses.

The school janitors know nothing about working a modern ventilating plant. There are £00 janitors employed by the board, and the board does not know whether these men are attending to their duties or not. He recommended that two prominent consulting engineers be engaged to examine the schools with

reference to their ventilation.

The building committee also made a report, saying that hereafter all plans for ublic schools in this city were to be sent to Boston to have judgment passed on them. Prof. S. E. "I know nothing about the meat scandals except what I have seen in the European papers. I find that a great deal of notice has has been taken of them, and while in Germany I heard the opinion expressed that they would encourage those who are unfriendly to the importation of American meat. While against City Superintendent Maxwell's a more rigid inspection may seem to furnish the remedy, the real trouble lies deeper. There was also much corroborative evidence of discrimination in favor of the Berwind White and keystone Coul and oke companies

The most significant fact in regard to favoritism to the two cost companies came through an unexpected admittance by Lawyer Gowen, of counsel for the railroad, who interrupted an examination of a witness to say that the Pennsylvania Railroad admitted having permitted the Berwind-White and Keystone coal companies to have certain cars which were being constructed, or had been constructed, by the railroad.

The railroad, he said, would not dispute that it paid for the cars and that payment was afterward made for them by the coal ompanies who received the rolling stock for private cars.

Mr. Gowen said he understood that this fact had been brought out, but he looked somewhat chagrined at having made the admission when Lawyer Glasgow said no record of such facts appeared in the evi-dence taken so far, and that he has been en-deavoring to secure such facts for some

This is an arrangement similar to that worked by Joseph Boyer, the clerk who was dismissed by President Cassatt.

He also frankly admitted attempting to give stock to Chief Clerk Schofield, who retired from the railroad service on June 1. Schofield refused it. In telling how some of the stock of the Greenwich Coke Company was disposed of the witness said that he had secured an option upon most of the land taken up by the company and that he had a gentleman's agreement with Congressman George H. In the Baltimore and Ohio communi of interest it was shown that the Pennsylvania alone is interested, having four of the six members. The Norfolk and Westthe six members. The Norioik and Western Railway executive committee has two Pennsyivania men out of five on that body. ENGLISH NOT OUR FRIENDS. Theatrical Man Says Real Feeling Is Shown by Attitude Toward American Plays.

Special Cable Despatch to THE SUN. LONDON, June 14 .- The Tribune prints the views of an unnamed American theatrical manager, who, it says, is not Mr. Frohman, but who is quite as well known, and whose knowledge of the theatrical business is speed, 121.34.

The anchor tests following the standequally as great, in reference to the badness of the theatrical season in London. The gist of the manager's statement is that theatrical losses are due to British anti-Americanism.

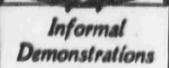

He says that Bishop Potter is the only American who had the courage to speak the cold truth about the two countries. There is a good deal of smooth talk about cousinship and it is probable the two nations would stand solid if ever it came to a great showdown, but the people here cannot forget that their young cousin has got ahead of them in almost every race and the English fist is doubled and the English

guard is up all the time. American plays in London are dead before they even get started. Only about four have succeeded here in ten years. It is undoubtable that the strongest and most ineradicable prejudices are answerable for this. It is unpleasantly significant that while the English freeze good serious plays like "The Lion and the Mouse" the

musical comedy theatres are crowded Things are not improved by the London critics. The manager added that the critics try to be fair even to American plays, but the hidden string is always there. If the British managers had to meet their liabilities to-day more than half of them would be bankrupt. Things will, because he far worse. The British managers had to however, be far worse. The British agers a year hence will be offering cans their theatres at any price, thoughtful American contingent know it.

KIDNAPPED BOY FOR REVENGE. Crook Whom Missing Lad's Pather One

Sent to Prison Suspected. PHILADELPHIA, June 13.-The police beieve that seven-year-old Charles Frederio Muth was kidnapped by a gang of criminals bent upon either revenge or ransom. Young Muth disappeared vesterday after he had been decoyed from his school by means of a forged note, which said that his mother was dying. This note was given to a messenger boy by a poorly clad man who gave him a quarter to take it. On the strength of it Muth was permitted to go. He met the man who gave the messenger the note. From that moment he disappeared utterly. Descriptions and photographs have been sent out broadcast. Two men and a woman were arrested to-night, but they are not

regarded as important captures. Three years ago three crooks were arrested charged with conspiring to rob Muth's jewelry store. When convicted before Judge Audenried and sent to prison by him they declared that Muth would rue the day he had testified against them. Recently one of them was released from prison and for him the police are now searching.

The letter which the Muths received late last night was evidently intended to ward off immediate pursuit. It read: "MR. MUTH: Your little boy will be placed in your hands to-morrow morning. There will be no need, nor any good, in exciting your neighbors or the police. Hold yourself

in check till then." Late to-night it was announced at the detective headquarters that the authorities were on the track of the kidnapper An order was sent out to arrest Harry Diller, 50 years old, for abduction. Diller is described as being 5 feet 10 inches in height, weighing 150 pounds, bearded and wearing a light striped suit of clothes. His description tallies with that of the man who was seen looking through the window of the Muth store several days ago. GILLETTE CAN SEB MINUTES

SO FAR AS CONCERNS HIS TESTI-MONY BEFORE GRAND JURY.

Robert A. Granniss Was Not Indicted for Perjury, as Erroneously Stated, but for Third Degree Forgery in Connection With a Report to the State Supt.

Choate, Hanford & Larocque, counsel for Dr. Walter R. Gillette, served notice on District Attorney Jerome yesterday of an application for leave to inspect the minutes of the Grand Jury on the indictments for forgery in the third degree and perjury against Dr. Gillette. An agreement was reached whereby Dr. Gillette is to have a copy of the testimony he gave before the Grand Jury, but not the other testimony. This was done by Justice Scott in the Supreme Court, Criminal Branch, after Mr. Jerome had had a conference with

Mr. Jerome decided not to oppose granting Dr. Gillette's request for his own testimony at least. In the Hummel case Justice Kenefick decided that Hummel was entitled to his own testimony before the Grand Jury, but not to any of the other testimony that brought about the indictments against him growing out of the Dodge-Morse case. Mr. Jerome decided that Justice Kenefick's decision is a precedent and Justice Scott agreed with him. This will not prevent Dr. Gillette from renewing an application in the future for a copy of all the testimony taken in his case

before the Grand Jury.

Through an error it was stated on Tuesday that Robert A. Granniss had been indicted for perjury. He was indicted for forgery in the third degree in connection with the filling of a report to the State Super-intendent of Insurance. The statute makes it forgery in the third degree and a felony fraudulently to omit to make an entry in an account, and there is some question as to whether there isn't a nice legal point involved in the charge against Mr. Granniss. A second indictment in connection with the same transaction was found against Mr.

same transaction was found against Mr. Granniss. This charges him with a misdemeanor in submitting to the State Superintendent a report not properly filled out.

There is nothing in the indictment charging Mr. Granniss with having anything to do with the padded bills of the supply department or that he committed perjury.

Some additional details of how the supply department of the Mutual Life Insurance Company was run in connection with Lysander W. Lawrence, favored stationer, came out yesterday. The present Mutual management is anxious to get the missing books of the supply department which were discovered by District Attorney Jerome, to assist them in suits that have or will be brought against Lawrence and others.

It was pointed out yesterday that the books, which are now in the possession of the District Attorney, would not be of any books, which are now in the possession of the District Attorney, would not be of any great value to the Mutual people. It was explained that Lawrence had a system on which he worked in sending out stationery and other supplies to branch offices of the

For instance, there was a code made up of letters to represent numerals. This code was used on all the supply cards, and it was very easy to tell under the system just what the order from the Mutual called for what the order from the Muttal caused for and just what had been supplied. It would be necessary for the Mutual to get the sup-ply cards of Lawrence, it was said, as the books of the supply department showed nothing. It is not expected that Lawrence

Would Scratch and Tear the Flesh Unless Hands Were Tied-Wasted to a Skeleton-Awful Suffering for Over a Year-Grew Worse Under Doctors-Skin Now Clear.

WOULD HAVE DIED BUT FOR CUTICURA.

"My little son, when about a year and a half old, began to have sores come out on his face. I had a physician treathim but the sores grew worse. Then they began to come on - a his arms, then on other parts of his body, and then one came on his chest,

others. Then I call--2111/11/11/11 ed another physician. Still he grew worse. At the end about a year and a half of suffering he grew so bad I had to tie his hands in cloths at night to keep him from scratching the sores and tearing the flesh "He got to be a mere skeleton, and was hardly able to walk. My Aunt advised me to try Cuticura Soap and Ointment. So great was her faith in it that she gave me a small piece of Soap to try and a little of the Oint-ment. I took it home without any faith, but to please her I tried it, and it seemed to dry up the sores a little. "I sent to the drug store and got a cake of the Soap and a box of the Cintment and followed the directions, and at the end of about two months

the sores were all well. He has never had any sores of any kind since. "He is now strong and healthy, and I can sincerely say that only for your most wonde ful remedies precious child would have died from those terrible sores. I used only one cake of Soap and about three boxes of Ointment. (signed) Mrs. Egbert Sheldon, R. F. D., No. 1, Woodwille, Conn. April 22, 1905."
